

SUBRAT KARMACHARYA

FULL STACK DEVELOPER | REACT · NODE.JS · DJANGO · LARAVEL

PROFESSIONAL SUMMARY

Passionate and self-driven Full Stack Developer with 2+ year of hands-on experience building real-world web apps using React, Node.js, Django, and Laravel. Skilled in crafting responsive UI with Tailwind and Bootstrap, and building scalable backend APIs with Express, Django REST, and Flask. Known for learning fast, adapting to any stack, and delivering clean, maintainable code even under pressure.

From building full MERN e-commerce platforms to working on automation tools in production, I thrive in both front-end finesse and back-end logic. I don't just write code — I solve problems, debug deeply, and ship features that matter. Always eager to learn new tech, contribute to impactful projects, and outperform expectations. Currently seeking opportunities to join a high-performing team and grow into a lead engineering role.

SKILLS

- **Front-end Development:** HTML, CSS, Bootstrap, Tailwind, JavaScript, React.js, Typescript, Zustand, Redux Toolkit, Next.js
- **Version Control:** Git
- **Back-end Development:** Node.js, Express, Django Rest Framework, Laravel, Flask, MongoDB, MySQL, PostgreSQL, Docker

WORK EXPERIENCE

Governance Automation Solution

Front-end Web Developer

2023 - 2024

The Legalities

Full Stack Web Developer

2024 - 2025

EDUCATION

The British College

Bachelor of Science with
Honours (Hons) in Computing

Sep 2022 - Present

PROJECTS

Professional Projects @ The Legalities

Case Management System

- Took ownership of 99% of the frontend using React.js.
- Built reusable UI components, modals, filters, dynamic tables, and PDF export screens.
- Integrated frontend with backend APIs and ensured a smooth, responsive UX.
- Also contributed to 30% of the backend logic using Django REST Framework, mainly focused on case filtering, search, and user access control.
- Project was delivered under NDA; GitHub and live links cannot be shared.

eCompliance – Internal Compliance Workflow System

- Built the entire frontend using React.js for a compliance tracking system with multiple user roles: Initiator, Reviewer, and Legal.
- Implemented dashboards, status-based form flows, and role-specific access views.
- Integrated with a Django backend to manage submission states, user permissions, and compliance logic.
- Developed key features like form submission flow, reviewer approval panel, and legal feedback loop.
- Project served as an internal tool for managing and auditing compliance processes (under NDA).

AI Compliance Prototype

- Developed a prototype compliance engine using React.js on frontend and Flask on backend.
- Implemented form-based questionnaire system, markdown rendering, and dynamic task generator.
- Designed UX to simulate a real AI-based compliance tool for internal use/demo purposes.
- Project was delivered under NDA; GitHub and live links cannot be shared.

Professional Projects @ Governance Automation Solution

(Worked here from my very first intern days till I became a Junior Developer)

Araniko Overseas Website

- Developed several frontend components.
- Contributed to the overall design and functionality improvements.
- Link : <https://www.aranikooverseas.com/>

Land Booking Site Frontend Demo

- Developed an entire Frontend site for demo of Land Booking site using React.
- Link : <https://landbooking.netlify.app/>

Information Bank Government Site

- Did Web scraping here using laravel for adding information to this site from other government sites.

Tourist info Site

- Added new routes and views to this site using laravel and made it responsive with new design.

Iccwd/CSI website for lumbini province

- Added new design to the header footer, related offices section and updated many other frontends for this site.

Progress report tracking site

- Changed the login page and added many forms to many section of the edited backpack admin panel using laravel.

Health Management Information System. (HMIS)

- Redesigned some of the frontend pages and components.

Professional Projects @ Freelance

Milwaukee Nepal Pariwar Website. (Unpublished)

- Technologies Used: React js, Node js, Express MongoDB, Tailwind
- Developed this website as my first freelancing project.
- Worked on designing and implementing the website to meet client specifications.
- Integrated google authentication for admin panel CRUD controls.
- Link : <https://milwaukeeee.netlify.app/>

Miraai Technologies Website Frontend.

- Technologies Used: React js, Tailwind
- Developed this website as requested by my senior for his company.
- Website Demo Link : <https://miraai-demo.netlify.app/>

Personal Projects.

Portfolio Website

- Technologies Used: Tailwind CSS, React.js
- Built a personal portfolio to showcase projects and skills.
- Implemented responsive design and modern UI elements using Tailwind CSS and React.js.
- Link : <https://subroxx.me/>

Ecommerce Full-stack Site

- Technologies Used: React, Redux Toolkit, Node js, express, mongoDB, axios
- Built an ecommerce site with user authentication, dummy payment method and shipping using react-bootstrap library
- Implemented state management and product handling with React and Redux Toolkit.
- Link: <https://subroxx-shop.onrender.com/>

Blog Posting Site

- Technologies Used: MongoDB, Next.js
- Developed a site for posting and managing blog entries.
- Implemented full CRUD operations with MongoDB for backend data management.
- Link: <https://subroxx-prompt.vercel.app/>

Job Posting Site

- Technologies Used: Laravel, Backpack, tailwind, MySQL
- Developed a site for job posting with user authentication and admin control using laravel backpack.
- Implemented full CRUD operations using eloquent ORM.
- Github Link: <https://github.com/SuBroXz11/laravel>

Ecommerce Front-end Site

- Technologies Used: React, Redux Toolkit, axios
- Built an ecommerce site using tutorial backend API.
- Implemented state management and product handling with React and Redux Toolkit.
- Link: <https://subroxx-ecom.netlify.app/>

PromptX Site (College 2nd year project)

- Technologies Used: React.js Django Rest Framework, MySql, Bulma
- Developed this project as my 2nd year college project.
- Link: <https://promptxz.site/>
